IDENTIFIERS *Washington

ABSTRACT

This three-part report presents a series of 45 tables providing data about enrollments, student characteristics, and personnel in the Washington community college system for Fall Quarter 1980. After a summary of the statistical highlights of the study, Chapter I offers historical data on Fall Quarter, full-time equivalent (FTE) and student headcount enrollments in the system as a whole and then for the 22 districts and 28 campuses in the state. In addition to providing data for academic, occupational, and community service categories, the report isolates data for state-funded programs and looks at enrollment by institutional intent and time and location of courses offered. Chapter II details student characteristics for the system and the colleges, rotating the data on a series of graphs, tables, and charts in a variety of ways. The characteristics considered are age, student intent, residency status, enrollment status (e.g., returning, transfer, etc.), veteran status, ethnic background, and credit-hour load. Chapter III presents the following information on classified staff, faculty, and administrative staff: headcount and FTE positions, sex, ethnic background, retirement program, type of employment, tenure status, assignment area (e.g., instruction, primary support, libraries, etc.), and average salaries and average base salaries. FALL 1980 HIGHLIGHTS

Fall Quarter, 1980, Washington community colleges enrolled 204,782 students, or in terms of full-time-equivalent students (total student credit hours divided by 15), enrollment was 102,320 FTE's. These figures represent enrollment supported by all funding sources: state appropriations; contracts with external agencies; and self-supported. However, Fall Quarter, 1980, is the first principal quarter in the second year of a biennium in which five percent of state appropriated dollars were called back. The impact of this budget reduction, coupled with continued high demand for community college services, is evident in some of the statistical highlights listed below.

FEWER CLASS SECTIONS WERE OFFERED -

924 fewer classes were offered than in Fall, 1979. This represented a net change resulting from a decrease of 1,380 state-supported classes and an increase of 456 contracted and self-supported classes. A decrease of 766 evening occupational classes accounted for 83% of the overall decrease.

THE NUMBER OF FTE-FACULTY DECREASED -

Overall, there were 127 fewer FTE-Faculty in Fall, 1980, than in Fall, 1979. This is a net change resulting from a decrease of 194 state-supported FTE-Faculty and an increase of 67 contractually or self-supported FTE-Faculty. The reduction in part-time faculty accounted for 80% of the overall decrease. The ratio of FTE-Students to FTE-Faculty was 24.7. This compares with a ratio of 22.6 for Fall, 1979.

STATE-SUPPORTED HEADCOUNT ENROLLMENT DECREASED -

7,138, or 8%, fewer students enrolled in state-supported classes than in Fall, 1979. At the same time, 5,058, or 174%, more students enrolled in classes supported through contracts, and 2,163, or 21%, more students enrolled in self-supporting community service courses.

THE PERCENTAGE OF WASHINGTON CITIZENS ATTENDING COMMUNITY COLLEGES DECREASED -

48 persons per 1,000 State citizens attended community colleges in Fall, 1980, compared with 50 persons per 1,000 in Fall, 1979.

FTE-STUDENT ENROLLMENT INCREASED -

FTE-Student enrollment increased by 5,592, or 6%, compared with Fall, 1979. Within this, the increase in state-supported FTE-s was 3,751, or 4%; the increase in contract-supported FTE's was 1,491, or 72%, and the increase in self-supported community service FTE's was 350, or 28%.

(over please)

PART-TIME STUDENT ENROLLMENT DECREASED, FULL-TIME STUDENT ENROLLMENT INCREASED -

8,453, or 8%, fewer part-time students (less than 10 credits) were enrolled in Fall, 1980, compared with Fall, 1979; however, 6,373, or 10%, more full-time students were enrolled. Part-time students accounted for 64% of the Fall, 1980 total enrollment as opposed to 67% in Fall, 1979. This is the first time in at least five years that the percentage of overall enrollment represented by part-time students has gone down rather than up.

DAY-ON-CAMPUS ENROLLMENT INCREASED -

Day-on-campus FTE's increased by 5,378, or 9%. For the first time in at least four years, the percent of total FTE's that are day-on-campus increased.

ENROLLMENT IN ACADEMIC COURSES INCREASED -

State-supported FTE-Student enrollment in academic subject areas was up 4,417, or 9%, over Fall, 1979, while enrollment in the occupational areas decreased 666, or 1½%. Within the occupational areas, occupational preparatory enrollments increased and occupational supplemental and home and family decreased.

HUMANITIES REVITALIZATION PROJECT SHOWS SIGNS OF IMPACT -

Within the overall increase in academic enrollment, the humanities subjects showed a growth of 12%, while non-humanities subjects grew 8½%.

MINORITY ENROLLMENT INCREASED -

2,346, or 18%, more ethnic minority students were enrolled compared with Fall, 1979. The portion of total enrollment that is comprised of ethnic minorities has increased from 6% to 8%.

FEMALE STUDENT ENROLLMENT INCREASED -

The number of women attending community colleges continued to increase: 588 more women enrolled in Fall, 1980 than in Fall, 1979. The percentage of total enrollment that is comprised of women also continued to increase from 53.6% to 54.5%.

RETURNING STUDENT RATE HAS INCREASED -

For the past three Fall Quarters, the number of students that were enrolled the previous Spring and returned to the same college in the fall has increased. In Fall, 1980, 12,732, or 32%, more students returned than in Fall, 1978.

FOREWORD

This is the first edition of the Washington Community College Fall Quarter Report. It is intended that it become an annual report following the conclusion of each Fall Quarter as the Fall Quarter is the focal point for community college data and is typically the term most reflective of college activities throughout an academic year.

The Fall Quarter Report is one of two annual informational and reference publications to be prepared by the State Board for Community College Education. The second is the Washington Community College Factbook, which will include information based on the full academic year, and will be published following the conclusion of the academic year. The publication of this first Fall Quarter Report represents a change in the emphasis and timing of prior publications. In the past, the Factbook has been published following Fall quarter and has included full prior academic year data plus the most recent Fall quarter. An addendum to this Factbook was then published at the conclusion of the academic year and was entitled "Washington Community College Factbook, Addendum A". The scope of the information contained in this Fall Quarter Report and the "new" Community College Factbook, Academic Year 1980-81 is essentially the same as the previous Factbook and Addendum A, but it is anticipated that the new structure, timing, and titles will better describe the emphasis of the two reports.

CHAPTER 1

STUDENT ENROLLMENT

INFORMATION

Full-Time Equivalent Student Enrollments

FTE student enrollment increased by 5,592, or 6 percent, compared with Fall Quarter 1979. Within this, the increase in state-supported FTE's was 3,751, or 4 percent; the increase in contract-supported FTE's was 1,491, or 72 percent; and the increase in self-supported community service FTE's was 350, or 28 percent.

Figure 1A below, and Table 1 on the following page show the historical FTE student enrollment for all funds since Fall Quarter 1969. Following Table 1, Figure 2A and Table 2 show the historical state-funded FTE student enrollment.

LOCATION AND INTENT OF COURSES

For Fall Quarter 1980, day-on-campus FTE's increased by 5,378, or 9 percent, over Fall Quarter 1979. For the first time in at least four years, the percent of total FTE's that are day-on-campus increased instead of decreased. Table 3 shows FTE student enrollment figures by institutional intent and location for all funding sources. Table 4 on the following page displays these figures for state-supported courses only.

STUDENT HEADCOUNT ENROLLMENT

Figure 5A below illustrates the rapid growth of community college enrollments. Headcount enrollment has increased by more than 204 percent since 1969.

For Fall Quarter 1980, overall headcount enrollment (supported by all fund sources) continued the upward trend, with an increase of 83. However, the number of students enrolled in state-supported classes decreased by 7,138, or 8 percent; while 5,058, or 174 percent more students enrolled in classes supported through contracts; and 2,163, or 21 percent more students enrolled in self-supporting community service courses. Figure 6A and Table 6 on page 10 show headcount enrollment in state-supported courses only.

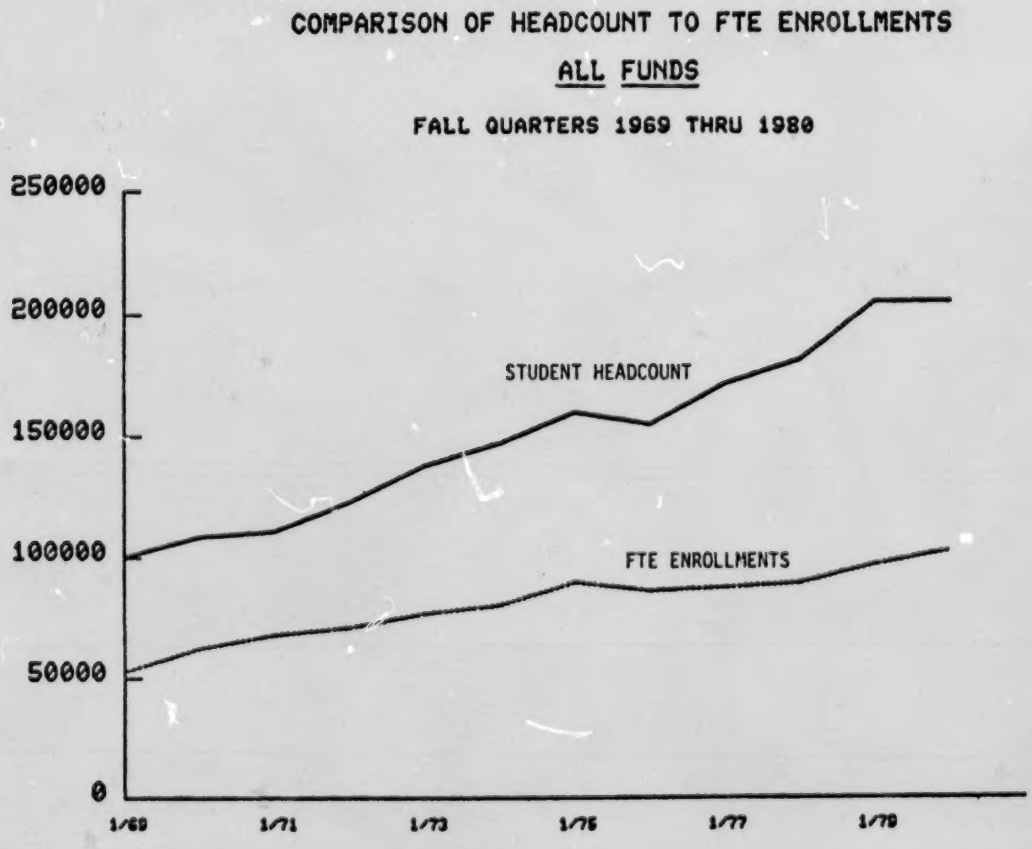
COMPARISON OF HEADCOUNT AND FTE ENROLLMENT
(ALL FUNDING SOURCES)

Headcount enrollment has grown at a faster rate than FTE enrollment, indicating a growing proportion of part-time students in attendance. This was particularly prominent during Fall Quarters 1977, 1978, and 1979. The figure below illustrates the difference in growth rate between headcount and FTE enrollments since 1969.



TIME AND LOCATION OF COURSES

Figure 7A below illustrates changes in the distribution of students by time and location that have occurred from Fall Quarter 1976 through Fall Quarter 1980. Table 7 on the following page shows this distribution further broken down by age groupings. Table 8 on page 14 provides similar figures for state-funded courses only.

For the first time in several years, the enrollment in evening and off-campus classes declined, while day-on-campus enrollment continued to grow.

FULL-TIME EQUIVALENT STUDENT ENROLLMENTS BY COLLEGE

Figure 9A below illustrates the relative size of Washington's community colleges based on FTE-Student enrollment for Fall 1980 (all funding sources).

Information on both FTE-Student and Headcount enrollment by individual college is displayed in various formats in Tables 9 through 15 on the following pages.

CHAPTER 2

STUDENT CHARACTERISTICS INFORMATION

STUDENT CHARACTERISTICS INFORMATION

This section is devoted to community college student characteristics. Information on the age, sex, ethnic background, residency status, veteran status, credit-hour loads and the sources of students has been provided for academic and occupational students. One of the common misconceptions with regard to the characteristics of community college students is that they are much younger than is actually the case. The pie chart on the opposite page shows the age disribution of Fall, 1980 students, and 60% of the students are 25 or older. Pages 26 through 50 contain a variety of tables discussing current and historical student characteristc information.

STUDENT INTENT CATEGORIES

The terms "academic" and "occupational" students used in this section are "institutional intent" categories, i.e., the institution's classification of courses in which students are enrolled. These categories should not be confused with "student intent" data. Student intent is the student's declared purpose for attending college. Student intent categories are displayed in the chart below. These intent categories are determined during the admission process and updated or clarified during each quarter's registration. Definitions for each of the student intent categories are in the chart below and the bar graph on the opposite page illustrates the relative distribution of students by their educational intent.

STUDENT INTENT CATEGORIES

(1) General Studies (Degree or Certificate): The student is or appears to be enrolled primarily for the purpose of completing a certificate or up to two years of study which may qualify for an associate degree, but without either a specific occupational or college-transfer objective.

(2) Academic Transfer: The student is or appears to be enrolled primarily with the intent of transferring earned credits for advanced study in upper division programs of four-year institutions.

(3) Adult Basic Education: Enrolled primarily for the purpose of completing an 8th-grade education.

(4) High School Diploma/GED Certificate: Enrolled primarily for the purpose of completing a high school diploma or General Education Development certificate, either through the community college or some cooperating secondary school.

(5) Developmental: Enrolled primarily for the purpose of attaining or reviewing basic skills of a remedial nature.

(6) Occupational Preparatory: Officially enrolled in an approved vocational program intended to provide entry-level occupational skills.

(7) Occupational Preparatory, Applicant: The student has or appears to have the intent of enrolling in an approved occupational program, but is not officially recognized by the institution as being admitted to the program.

(8) Occupational Apprentice: The student is officially enrolled in occupational apprentice program courses that supplement or are related to regular work experience received on-the-job, and is registered with the Washington State Apprenticeship and Training Council and/or the Federal Bureau of Apprenticeship Training.

(9) Occupational Supplemental: The student is or appears to be enrolled primarily to augment existing job skills.

(10) Occupational Home and Family Life: Enrolled primarily to augment home or family-life skills.

(11) General Studies (Non-Degree/Non-Certificate): The student is or appears to be enrollef for "personal enrichment" or to explore educational opportunities.

(12) Undecided: The student has specifically stated that he cannot declare a specific objective or long-range goal associated with his enrollment at the time, and none of the above categories apply.

(13) Other/Not Indicated: The student did not select a category, and the institution did not assign one.

NOTE: Numbers in parentheses indicate number of persons reported in each position.

TABLE 46: AVERAGE BASE SALARIES
ANNUALLY CONTRACTED (9-MONTH) PROFESSIONAL PERSONNEL
WASHINGTON COMMUNITY COLLEGES
FALL QUARTER 1980

The following data reflects all individuals in nine-month contracts (160-184 service days), i.e., includes teaching faculty as well as non-teaching faculty such as librarians, counselors, etc. All fund sources are included (both state-supported and sponsored programs). This salary data should not be used to compute salary percentage increases. It does not take into consideration attrition, mid-year increments, or individuals on sabbatical from one year to another.
